

## CENTRAL JERSEY COALITION AGAINST ENDLESS WAR

... is a thriving local organization founded in 2002 in response to our government's march toward war. We are your neighbors working together for peace, civil liberties, and a just foreign policy.

We object to our government's attitudes and behavior, such as:

- War (might makes right) as U.S. foreign policy
- The transformation of the American Republic into an American Empire
- The frontal attack on our Constitution and civil liberties in the so-called Patriot Act, by which any of us can be secretly monitored or held without due process
- Branding the questioning of government policy as un-American

So we have formed activist committees that plan public events, reach out to our schools and communities, interact with the press and our legislators, and facilitate public discussion and participation.

We look to our surrounding community for the ideas and creativity that will make a difference. We welcome individuals from across the religious, ethnic, economic and political spectrum.

**ARE YOU CONCERNED?**

- More than 6,000 American soldiers, over one million Iraqi and Afghani citizens, and many other civilians have died in the wars since 2001
- The war on Iraq was based on false premises for which the responsible parties have not been held accountable
- Drone attacks (up nearly 50% in 2009), ostensibly to “save” Afghanistan, are destabilizing Pakistan.
- Our government ignores the Geneva Conventions and allows extraordinary rendition and torture of prisoners, yet no high-level U.S. official is held accountable
- Our military is exhausted by repeated tours of duty with sky-rocketing cases of traumatic brain injury, PTSD and suicide
- Al Qaeda recruitment is up and we are at risk for increased terrorist attacks
- Nuclear weapons continue to spread throughout the world, helped by past and current U.S. policies
- Both citizens and noncitizens are detained, deported and murdered with no legal recourse
- There is an unprecedented and unconstitutional concentration of power in the presidency
- Our phone calls and e-mails are monitored in violation of our 4<sup>th</sup> amendment rights
- US military spending exceeds 50% of the discretionary government budget
- Economic hardships, historic deficits and climate catastrophe threaten our children’s future
